FIBRE BOARD PACKAGING

the easy way to be Green

100% Natural Origin

Paper and Fibreboard products are made from a natural and renewable resource: the forest. Fibreboard packaging requires no washing or drying and thus no water or detergents in order to be safe. Just recycle.

Fit for Purpose & Tailor Made

Fibreboard is incredibly versatile and can be cut and folded into any shape or size for optimum use of space. It is a means of delivering a product to a customer in good condition and is very cost effective packaging.

Reduce, Reuse, Recycle

New Zealand recycles 78% of its Paperboard, amongst the world's leaders. Paperboard is biodegradable, recyclable and a valuable commodity. Few industries recycle as much as the paper & paperboard packaging industry.
